## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 4-5, 8-9, 11-13, 17-18, and 20-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mizuno (U.S. 4,274,423) in view of Corl (U.S. 5,715,827), Van Bockel (U.S. 6,159,156), and Edwards (U.S. 5,456,682). Please refer to paragraphs 2-3 of the office action dated April 19, 2007.

3. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Mizuno in view of Corl, Van Bockel, and Edwards as applied to claim 1 above, and further in view of Yunoki (U.S. 4,686,964). Please refer to paragraph 3 of the above cited office action.

### ***Response to Arguments***

4. Applicant's arguments filed 06/033/2009 have been fully considered but they are not persuasive. In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

Art Unit: 3764

5. Applicant has further argued that the references in combination teach away from a wireless data carrier embedded in an embedded medium. Examiner respectfully points out that the claims as presented do not required the data carrier embedded in the embedding medium. As broadly claimed, the data carrier is embedded in the recess, and the 'embedding medium' is situated between the data carrier and the opening of the recess. Applicants' other arguments attack the references individually and fail to take into account their use as teaching references for the deficiencies of the base reference. Examiner has provided motivation taken either from the references themselves or based on the knowledge of the skilled artisan.

### ***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
